

GPI Design has an opening for a designer / CAD designer within our specialized design-build firm in Westlake, OH. Join our team of highly motivated designers & engineers who craft custom backlit features within commercial offices and hospitality spaces.

We are looking for individuals with backgrounds in interior design and/or architecture. You will be assisting senior-level designers in executing highly detailed shop drawings and client communication. Thinking through the design and understanding component relationships is essential. Must communicate with project team as you uncover potential conflicts within drawing sets. In addition, you will be assisting with material research, lighting design research, graphic design, marketing assistance, and some general office duties.

The position to be filled is most suitable for an individual that embodies an adaptable willingness to learn and an energetic attitude. You will be asked to perform many duties that would typically fall under senior-level decision making. Ideal candidates possess the following qualities & skills:

- Communication with team members within a small firm setting
- Creative edge and ability to bring fresh new ideas to the table
- Willingness to be exposed to a variety of tasks and comfortable working independently with an ability to self-manage for meeting deadlines
- Previous experience in reading, understanding, and creating construction drawing sets and fabrication details
- Understanding how components fit together in reality, and communicating those relationships verbally and graphically
- Fluent and enjoy working in AutoCAD both 2D and 3D
- Experience in Adobe Photoshop, InDesign, Illustrator, Sketchup and Revit preferred
- Comfortable with Microsoft Office
- Aptitude for mechanical engineering, construction, industrial design, lighting design, graphic design, or marketing is a plus
